

MARCH 2010

PUTTING KEY CONTROL IN YOUR HANDS

SIMPLEK® IS THE MOST ADVANCED KEY CONTROL SOFTWARE, PROVIDING ALSO A LARGE SET OF FEATURES FOR PHYSICAL SECURITY & FACILITY MANAGEMENT

FEATURES:

- Easily manage master key systems, keys, key rings, key holders, buildings, floors, doors, requests, work orders, floor plans (add-on modules: items, assets, rooms, public safety incident and daily reports)
- Have true “know before you go” detail of every piece of hardware on a door, including the complete door hardware schedule and maintenance log
- Simplify Keying with the Master Key System Generator & Core pinning calculator (for many system types)
- Easily import master key systems, key distribution lists, buildings, doors and people with customizable MS Excel import templates
- Link photographs, signatures and documents of individuals holding keys with doors, buildings, door hardware, etc.

TESTIMONIALS:

“The program is working very well as I pound on it everyday and it takes it like a champ! I have been importing new key systems (tens of thousands of them) with no problems at all.”

- Edward Nehiley,
Locksmith, Boston University

“We have been using SimpleK for about 1 year. Before we purchased the product, I had done a lot of research in key control systems. I can now say that after using SimpleK, this is the key control program Locksmiths have been waiting for. My main concern was the data transfer which scared me. The SimpleK people are unbelievable to work with. Most companies will sell you their product and then you are all on your own. That is not the case with SimpleK support. The other part I was concerned with was how user friendly it would be. Well, in just a very short time, anyone can be taught how to use the program. This program is head and shoulders above anything out there.”

- Bob Mead, Locksmith Supervisor,
Walla Walla University

“I would recommend SimpleK to any institution that seeks to manage not only their master key systems, but furniture, key rings, reports, bringing order out of chaos and a whole lot more.”

- Daniel Lascaze, Locksmith, SME,
Medical Center, Boston, MA

E-mail your questions to:
eac@idnhhoffman.com

Q: What is the new HES 8000 series electric strike?

A: As of February 1, 2010, the HES 5900 concealed electric strike is now known as the 8000 series strike. In accordance with the switch, the 591-595 faceplate options are now the 801-805 options. All HES strikes will come with new pigtails for 12V and 24V wiring. A good way to find additional information on the HES 8000 series is to visit our website at: www.idnhhoffman.com and select *List of Manufacturers* in the PRODUCT INFORMATION tab for the HES website.

If you need additional help, please contact eac@idnhhoffman.com

DOOR GUYS

E-mail your questions to:
osd@idnhhoffman.com

Q: I need to install a kickplate onto a fire rated door. Does the kickplate also need to be fire rated?

A: Labeling is not required where the top of the kickplate is not more than 16" above the bottom of the door.

If you need additional help, please contact osd@idnhhoffman.com

When placing a door order through our Door Division, mention this question and save \$20 on your door order of \$300 or more. Discount available one time per customer, valid through March 12. Order must be placed through IDN One Stop Door in order to receive discount.

STRONG & RELIABLE DATABASE

To fully integrate all stored information in a well organized and optimal manner, SimpleK relies on a strong relational database. Different database formats are available.

FILE DATABASE:

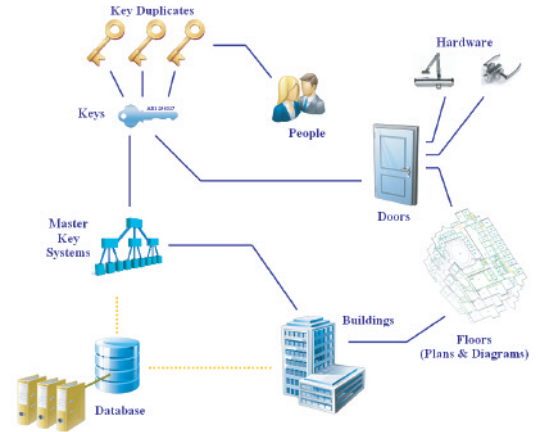

- Designed for small databases and few users
- Encrypted data
- Not compatible with Add-on Modules

MS SQL DATABASE:

- Intended for larger databases with many users
- Efficient network communication
- Can use Windows Group to configure Access rights
- Complete Management Tools

MYSQL DATABASE:

- Intended for larger databases with many users
- Can be installed on a many Operating Systems

PAPERLESS PROCESSES

SimpleK helps improve your key control processes in many ways with integrated forms, wizards, and by removing paper from signing documents (e.g., key issuance agreement). SimpleK is compatible with Topaz Systems electronic signature capture products, allowing electronic handwritten signatures to be bound directly to digital documents. It will generate detailed, time-stamped document history of the entire approval process.

Save time and money by replacing paper processes with electronic signature and document solutions!

To schedule a demonstration of SimpleK or for more product information, please contact your local IDN H. Hoffman Representative

A DIAGRAM IS WORTH A THOUSAND WORDS

SimpleK allows you to import maps and floor plans (*converted .dwg to .jpg, .bmp or .gif*) and add door icons to dynamically link them to your database. This way you can navigate quickly from your door datagrid to floor plan and click to access your complete door information with associated keys, hardware, core pinning, core change wizard, "Who has access", etc.

Paul Krause, C.R.L.
