inTouch™

Stand-Alone Touchscreen Access Lock

Get Closer so I can Talk

A simple **TOUCH** brings the interactive touchscreen to life for effortless day-to-day access.

Use **VOICE-GUIDED** programming for simple updates to user information.

Simple | Strong | Stylish

inTouch™ Stand-Alone Touchscreen Access Lock combines robust cylindrical locksets with a contemporary electronic aesthetic. Users benefit from an interactive touchscreen that makes day-to-day access effortless and offers voice-guided programming for simple updates to user information in the event of staffing changes or security breaches. Ideal for a wide variety of applications, inTouch is recommended for **management offices, patient records storage, storerooms, staff lounges, restroom doors, etc.** Anywhere that requires simple controlled access is an ideal place for inTouch!

Features:

- Easy-to-use – durable touchscreen, keyless entry
- Simple – voice-guided programming with visual verification
- Control – remote unlock capability; silent, lock-out, and passage modes; auto re-lock
- Flexible – up to 1,000 users with four 12-digit PIN codes
- Diverse – tri-lingual, English/Spanish/French
- Efficient – sleep mode saves battery power
- Two operational modes – Easy mode (9 users) or Advanced mode (1000 users)
- Menu access to voice guided programming available through touchscreen
- 4 AA alkaline batteries
- 9 Volt battery connections for emergency access
- Remote unlock available for allowing access through switch
- Certified ANSI/BHMA A156.2, Series 4000, Grade 2
- Weather-resistant

ASSA ABLOY

5900 SERIES

X-IN™

POWER OPERATOR

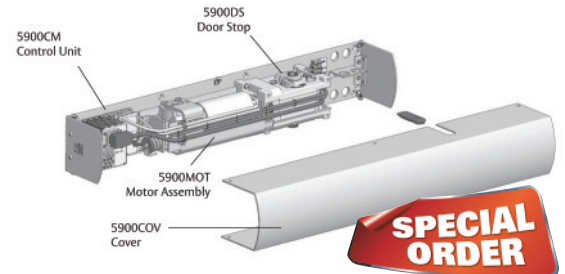

An intelligent, cost-effective option for power door control. X-in calibrates door weight, latch and sweep speeds and positioning based on ADA and ANSI Standards. This electromechanical operator is a smart solution for automated moderate-to-high traffic openings in healthcare facilities, schools, offices and public buildings.

ONE TOUCH PROGRAMMING

Quiet | Smooth | Automatic

- Quiet operation
- Non-handed units
- Push or pull side mounting
- Power Assist
- Obstruction detection
- Motor start delay
- Built-in door stop
- Pre-wired for activation hardware
- 110° maximum door swing
- 200 lb. maximum door weight

E-mail your questions to: osd@idnhoffman.com

Q: Can I get a door that has the strength of steel but looks nicer than just a flat steel door?

A: Yes, IDN H. Hoffman is able to provide you with an embossed hollow metal door. These doors have the appearance of raised panels that are stamped into the steel skin during construction. Embossed doors are available in 1, 2, 6, or 8 panel, as well as a half glass with crossbuck designs. There are, however, some size & hardware restrictions. For further information, please contact osd@idnhoffman.com

If you need additional help, please contact osd@idnhoffman.com

9000 SERIES

TRINITY™

DOOR CLOSER

While Trinity looks and acts like a door closer, it's actually a new member of your facility maintenance team. Powered by an onboard generator, the automatic valve monitors and adapts continually to changes in environmental conditions, making trips to the door for adjustments a thing of the past. Simply install Trinity, adjust and walk away.

ENERGY EFFICIENT

Efficient | Intelligent | Adaptable

- One automatic valve controls backcheck, delayed action, sweep and latch speeds
- Specially designed seals replace traditional o-rings
- Meets Americans with Disabilities Act (ADA) requirements
- No wiring required, all power provided by built-in-generator
- One-piece, reinforced body construction
- Self-adjusting latch transition
- Multi-sized spring (1-6)
- Non-handed

Paul Krause, C.R.L.
E-mail your questions to:
keywizard@idnhoffman.com

Q: There have been several inquiries about American Lock Co.'s built-in locker locks. 1) Are the locks still being manufactured? 2) Are cut control keys available? 3) If cut control keys are not available, what key blanks do I use?

A: 1) The answer to the first question is that the locks are no longer manufactured. 2) The answer to the second question is that cut control keys are no longer available. 3) The answer to the third question is that control key blanks are not available. The key blank looks similar to the Chicago DK4 (Ilco 1041G/Jet CG1), but it is longer. The DK2 (Ilco 1041D) has an overall longer blade, but the shoulders are the same distance from the tip of the key so it doesn't work. The only thing to do is to replace the locks with the Master 1600 (combo) or 1700 (key operated) series locker locks.

8000 SERIES ELECTRIC STRIKE

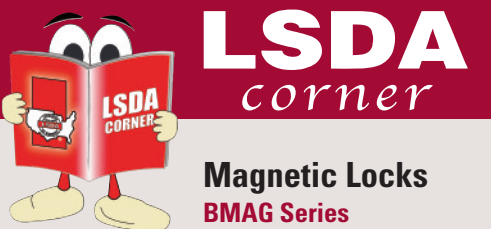

As of February, 2010, the former **5900 Series Electric Strike** is now known as the **8000 SERIES ELECTRIC STRIKE**.

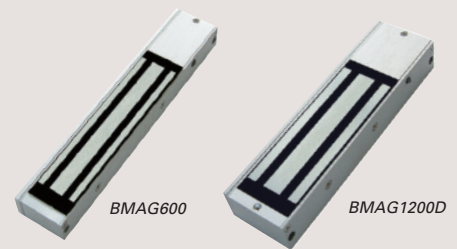

The 8000 series is a compact, high performance electric strike featuring a unique concealed design for increased security. There is no cutting on the frame and vertical adjustability accommodates door sag and misalignment. It continues to offer ease of installation and unmatched performance. Updated to ensure clearance in an even greater selection of frames, the change in model number highlights an increase in compatibility, as this series now fits within an ANSI frame prep set at all hinge and door spacing with no frame interference.
