MAY 2010

## MASTER LOCK TESTIMONIALS

I live on a Lake and own a boat shed for my equipment worth large amounts of money. I had a Master Lock Pro Series 6321 High Security Padlock on the door, and it prevented two attempts at burglary. Thank you Master Lock!  
**Jack - Petoskey, MI**

I was issued a long shackled Master Lock at the Coast Guard boot camp on Jan. 12, 1960 which was used for my seabag. I remained in the Coast Guard until Feb. 1980. The lock traveled all over the world with me and it is still being used on barn doors today.  
**Jay - Delmont, NJ**

I recently purchased your "Street Cuffs" for use on my motorcycle and when I parked my bike and put on the Cuffs I felt confident in them. When I came back to my bike the motorcycle was in pieces but guess what? The Street Cuffs were still holding on tightly.....thanks to MASTER LOCK!!!  
**Anastasia - Averill Park, NY**

I just want to say "Thank you" to Master Lock! Many years ago, as a new police officer, I purchased a combination lock to secure my belongings...now, almost 34 years later, the lock works as well as it did when I bought it! Perhaps your workmanship is too good because I have never had to purchase another lock! It is truly a "lifetime" lock!!!  
**Rod - Manhattan Beach, CA**

Your Master Lock door security bar is the ONLY thing that stopped a criminal from entering my hotel room through a sliding glass door in Lucea, Jamaica, on 11/16/08. I am wife and mother of two young children who was alone when I was startled awake by a loud "pop." It was the final force my would-be attacker applied to the door after successfully disengaging the door locks while I slept. The door was only a matter of feet from my bed. It was only because of the strong security bar that the door jammed and did not open and the perpetrator fled. Thanks to you, I was spared a horrific, and very possibly deadly, experience. It is the wisest \$18.95 I have ever spent, and I will never again travel without it. THANK YOU for making a product that delivered the protection you promised when I needed it most. Because of you, I returned safely to my family and wonderful life. I am grateful beyond words.  
**Carolyn - Franklin, TN**

**Q:** Is it possible to activate two devices that operate at different voltages from only one output?

**A:** Yes, it is possible. In order to activate two devices operating at different voltages from only one output, I suggest using a separate double throw relay, like the Altronix RB1224 (EZ#070290) stocked by IDN H. Hoffman. For further information on wiring, please contact the Electronic Access Control Specialists at the Chicago Branch.

**Q:** Is it possible to order a fire rated door with a window that does not have the wire in the glass?

**A:** Yes. Over the last couple years there have been advancements in glass technology. You can now have a wire free window in a fire rated door by using a glass product specially designed for this application. In addition, you can exceed the 100 square inches that wire glass was limited to. However, there are still some size & rating restrictions. If you have additional questions, please let us know.

# STEALTH LOCK

## 1ST INVISIBLE KEYLESS CABINET LOCKING SYSTEM

USED IN CLOSET, KITCHEN, EDUCATION AND HEALTHCARE ENVIRONMENTS

### FEATURES:

- Designed to pass the ANSI/BIFMA 50 lb pull strength specification
- Each Receiver Latch Locks a single door or drawer
- Each Transmitter Pad can activate unlimited Receiver Latches within range; Range is 15 feet
- Receiver latch mounts within 1/2" drawer suspension clearance
- Radio frequency technology permits the Transmitter Pad to be stored anywhere - leaving no trace of visible hardware or signs of being secured
- Allows multiple wood cabinet doors or drawers to be locked from a single Transmitter Pad
- Batteries: Receiver Latch 4-AAA, Transmitter Pad 1-CR2032
- Battery Life: 6,000 cycles = 4 open/close cycles per day for 2 years
- Optional external power supply
- Programmable with both User code and Supervisor code (four to eight digits) to operate the lock(s)
- Optional modes for single use and self locking
- For interior use only - recommended temperature range of 50°F to 120°F

**THIS KIT CONTAINS ALL PARTS NECESSARY TO LOCK ONE DOOR OR DRAWER INCLUDING:**

- 1 receiver latch
- 1 transmitter pad
- 1 cabinet strike plate
- 1 installation tool

E-mail your questions to: keywizard@idnhoffman.com

- Q:** A customer came into my shop with a Rocketa Scooter key blank. What key blank should I use?
- A:** Try the Suzuki motorcycle key blanks.
- 
- Q:** I am trying to find a longer version of the Ilco key blank 1617.
- A:** The longer version would be the Ilco 1573E CLB5 Club key blank.
- 
- Q:** I need help identifying this key blank. It is for after-market locking gas caps. The key says "GAS" on one side and has a code number of "C1440" on the other side. I hope you can help. Thank you.
- A:** It should be the Ilco key blank 1611R.
