PRIMUS XP

THE SECURITY SOLUTION THAT FITS EVERY DOOR IN YOUR BUILDING.

The Primus XP patented key system is a scalable system that you can use to control access with varying levels of security throughout your facilities. This simplifies your key management system by giving you just one key that's backward compatible and supports multiple cylinders.

- Conventional and interchangeable cores.
- Supports all sizes of key system, from small to large, with multi-level key hierarchy where needed.
- Fits most non-Schlage locks, eliminating costly and time-consuming hardware changes.

Ask a Sales Representative about the Primus XP Promotion for both New & Existing Dealers.

Promo Dates: 8/1/09 - 12/31/09

DESIGNED TO FIT EVERY LEVEL OF ACCESS CONTROL.

The scalable design of the Primus XP key system means that the system can be integrated into a multi-level security system that includes Schlage mechanical, electro-mechanical and networked security solutions. Primus XP also works with Falcon mechanical locks. **Schlage key systems are available in a variety of system types:**

- Open
- Restricted
- Restricted patented
- High security

PATENT PROTECTED SECURITY.

Primus XP is patent protected until 2024, the longest patent in the market today. That means you'll get the highest level of security for the longest period of time. Combine the duration of patent protection with the exclusivity of the keyway and Primus XP adds up to one of the most cost effective security solutions available.

E-mail your questions to:
eac@idnhhoffman.com

Q: How do you convert a sourced voltage trigger output into a dry contact output?

A: To make the conversion, use a relay, such as the Altronix RNSNTTL, which has both positive and negative voltage trigger inputs. The output of the relay would then be a dry contact input to another device.

If you need additional help, please contact eac@idnhhoffman.com

E-mail your questions to:
osd@idnhhoffman.com

Q: I have a door that is hitting the threshold (I think the concrete heaved a little). Can I fix it without removing the door?

A: In many cases, the problem can be solved by replacing the threshold with a low rise threshold (usually 1/4" smaller).

If you need additional help, please contact osd@idnhhoffman.com

SCHLAGE

KING COBRA KC5000 Series 2

CYLINDRICAL & MORTISE LOCKS

KC5000-2 LOCKS are designed for cylindrical and mortise door preps and can be used in any facility on any door where electronic access control is desired to simplify key control and increase the level of security. This lock is a perfect solution for hospitals, schools, multi-family housing, airports, government facilities, property management, and more. A great security, convenience and performance upgrade from a reliance on mechanical keys or mechanical pushbutton locks.

KC LOCKS FEATURE:

- SNAP programmability
- 1000 individual user codes and credentials
- 1000 audit trail events
- Enhanced environmental durability

KING COBRA KC9000 Series 2

NARROW STILE

KC9000-2 LOCKS are designed for use with aluminum doors that rely on various latches and exit devices to secure the opening. These narrow stile door solutions can be used in any facility, on any door where electronic access control is desired to simplify key control and increase the level of security. A perfect solution for retail storefronts, restaurants, multi-family entrances and commercial office space. Secure the front entrance and interior rooms by combining with KC5000 locks. A great security, convenience and performance upgrade from a reliance on mechanical keys or mechanical pushbutton locks.

KC2 LOCKS ARE THE NEXT GENERATION IN THE KING COBRA FAMILY.

All King Cobra locks provide an easy upward migration path away from a reliance on mechanical keys to maintain building security and access control. Once the integrity of the mechanical key system has been re-established, locks with pin codes or electronic credentials can be used to maintain ongoing control of where and when access is granted.

FALCON

8200 SERIES

AUTOMATIC OPERATOR

The new Falcon 8200 Series is a smart solution to improve accessibility. Designed for applications like assisted living and ambulatory care, where ease of use is critical, the Falcon automatic operator provides dependable performance at an affordable price point.

- ✓ Easy, One-Person Installation
- ✓ Wireless Actuators
- ✓ Great Value
- ✓ Pre-Load Strike Assist
- ✓ Ready To Go Right Out Of The Box

FEATURES:

- **SmartLatch** - Senses and overcomes external pressure conditions with a graduated energy assist for secure latching.
- **Push 'n' Go** - Selectable feature allows door to open automatically as soon as it feels pressure.
- **Open Position Learning** - Automatically sets the opening position to eliminate wall and door damage.
- **Obstacle Obstruction Detection** - Safety feature stops and reverses door direction when distress or an obstruction is sensed.
- **Pre-Load Strike Assist** - Removes load on strike lip with a one second delay allowing the door to release and automatically open.
- **LED Light Illumination** - Light illumination on control box signals accurate installation and helps with connection diagnostics.
- **On Board Power Supply (12V AC)** - Powers the accessories without the need to install an external power supply.

Steel aluminum finished cover makes the 8200 Series aesthetically pleasing for any application.

Intelligent control box provides the most precise door operation and includes adjustable features for all commercial applications.

One-piece mounting bracket eliminates the need for end caps, reducing parts and installation time.

Non-handed motor gearbox uses mechanical controls to act as a size 3 door closer in manual operation.

Mounting bracket contains fastening notches to reduce parts and allow for faster and easier installation.

E-mail your questions to:
keywizard@idnhhoffman.com

Q: A customer brought in a locking bank deposit bag with no name on it. What key blank does it use?

A: Ninety percent of the bags that I have seen have been made by Arco. The blanks to try would be Ilco # 1130, 1130R, 1131, or 1131R.

LSDA corner

Weather Resistant Padlocks

Laminated steel body padlock with anti-rust & corrosion resistant plating.
