

The Problem Solver

The D610 / D620

is a versatile and cost-effective lock for residential, multi-family and light commercial applications.

PROBLEM: I need a lock in one of the less popular or specialized keyways.

SOLUTION: Cylinders can be replaced with LSDA C500 and other readily available knob/deadbolt cylinders.

PROBLEM: I need a lock that fits both 2-1/8" and 1-1/2" holes.

SOLUTION: The lock fits 1-1/2" holes, but comes with trim rings that allow use in 2-1/8" holes, too.

Available in: US10B oil-rubbed bronze, US32D satin stainless steel and US3 polished brass finishes.

Locks are stocked with SC1 keyway and less latch.

PROBLEM: I need a double-cylinder lock on a gate that can't be easily disassembled with a screwdriver.

SOLUTION: Tap-in plugs make it very difficult to remove the thru-bolts.

PROBLEM: Sometimes I need a deadbolt, sometimes I need a deadlatch.

SOLUTION: Locks are sold without a latch. Add an adjustable (2-3/8"-2-3/4") deadbolt (only 1-7/8" diameter) or a sturdy gate latch in either backset.
